## EDUCATION

**Ph.D. Communication** *Anticipated 2027*
Michigan State University
Department of Communication
Advisor: Dr. James Dearing
Area of Focus: Diffusion of Innovations, Organizational Communication, Environmental & Energy Communication, and Strategic Communication

**M.A. Public Policy** *Graduated in 2023*
Michigan State University
Department of Political Science

**M.A. Mathematics** *Graduated in 2014*
Eastern Michigan University
Department of Mathematics

**M.A. Applied Economics** *Graduated in 2008*
Eastern Michigan University
Department of Economics

**B.A. Economics** *Graduated in 2002*
University of Michigan-Flint
Department of Economics

## TEACHING EXPERIENCE

**Instructor**
COM 440: Organizational Communication Structure *Fall 2025; Summer 2026; Spring 2027*

**Course Coordinator**
COM 100: Introduction to Human Communication *Fall 2026; Spring 2027*

**Teaching Assistant**
COM 240: Introduction to Organizational Communication *Fall 2023; 2024; Spring 2025*
COM 340: Leadership and Small Groups *Summer 2025*

## EMPLOYMENT

**Principal Rate Analyst II** *Feb 2019 – Aug 2023*
Consumers Energy Company
Rates & Regulation
Developed and maintain the company's electric rate design models used to support recovery of $7 billion in annual revenues in the regulatory proceedings. Collaborated with team members to research

various demand-side energy resources, renewable energy, and electric vehicle rate design topics and trends observed in the industry. Developed and maintained the financial model and database used to forecast electric rates by class. Developed the weekly scorecard to track team projects and problem-solving initiatives.

**Principal Analyst II** *Feb 2015 – Feb 2019*
Consumers Energy Company
Clean Energy Products
Coordinated and managed regulatory filings and reporting, monthly budgeting process, quality control audits, and Sarbanes-Oxley compliance. Provided regulatory and empirical analyses supporting recovery of $200 million in annual energy efficiency investments. Maintained detailed program measure models used in developing the company's energy efficiency investments and calculating program cost effectiveness. Provided written and oral expert testimony supporting the recovery of funding for customer experience and marketing.

**Principal Analyst I** *Feb 2013 – Feb 2015*
Consumers Energy Company
Sales & Revenue Forecasting
Developed and maintained the company's electric and gas econometric models used to forecast customer deliveries, system peak demand, customer counts, and revenues. Provided written and oral testimony supporting the company's electric and gas forecasts. Prepared various statistical analyses to identify the lower and upper bounds of forecast risk from changes in weather, technology, and customer behavior.

**Senior Analyst** *Feb 2012 – Feb 2013*
Consumers Energy Company
Economic Portfolio Management
A special assignment in which I was asked to evaluate the economic benefits and costs of implementing technology to improve operational performance in the company's distribution and customer operations department. Researched and presented the use of operational research techniques to optimize spending and performance in the department. Assisted in identifying operational risks to electric and gas distribution assets.

**Senior Rate Analyst** *Apr 2009 – Feb 2012*
Consumers Energy Company
Rates & Regulation
Developed and maintained the company's electric and gas rate design models used to support recovery of $6 billion in annual revenues through contested regulatory proceedings. Provided expert testimony supporting price and rate design initiatives and changes. Collaborated with team members to research various rate design topics and trends observed in the industry. Developed and maintained the financial model used to calculate the company's electric substation and delivery system financial contributions supporting economic development expansions.

**General Rate Analyst** *Nov 2004 – Apr 2009*
Consumers Energy Company
Rates & Regulation
Provided written and oral expert testimony supporting electric and natural gas price and rate design changes. Prepared various economic models and statistical analyses to measure customer choice rate

competitiveness and company profit margin impacts. Collaborated with senior team members to research various rate design topics and trends observed in the industry.

**Rate Analyst** *Sep 2002 – Nov 2004*
Consumers Energy Company
Rates & Regulation
Assisted senior team members with preparing electric and natural gas rate design models to support regulatory proceedings. Collaborated with senior team members to research various rate design topics and trends observed in the industry. Assisted with various economic and financial studies.

## PUBLICATIONS

### Book Chapters

Co-Authored with Dr. James Dearing. Diffusion of Innovations, In Craig & Kim (Eds.) forthcoming edition of *International Encyclopedia of Communication Theory and Philosophy.* *2026*

Co-Authored with Dr. James Dearing. Designing Complex Health Innovations for Dissemination and Diffusion, In Richards & Rahm-Halberg (Eds.) forthcoming edition of *Complex Interventions in Health.* (Chapter 29). *2025*

### Refereed Journal Articles

Lapinski, M., Kerr, J., Miller, H., Moonsun, J., and Tracey, K. "Persuasive Communication, Financial Incentives, And Social Norms: Interactions and Effects on Behaviors," *Current Opinion in Psychology* *2024*

### Manuscripts in Preparation

Miller III, H., Larson, R. S., Dearing, J. W., and Lapinski, M. "Signaling Organizational and Peer Support to Promote Intra-Organizational Adoption of Innovations" *Under Review*

## REGULATORY PROCEEDINGS

| | | |
|---|---|---|
| Docket U-14547 | Natural Gas Base Rate Case | Requested approval to increase rates to recover an additional $132 million annually from customers. |
| Docket U-15001-R | Power Supply Cost Recovery Reconciliation | Request to recover $1.6 million in discounts provided in 2007 related to economic development. |
| Docket U-15245 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $144 million annually. |
| Docket U-15415-R | Power Supply Cost Recovery Reconciliation | Request to recover $3 million in discounts provided in 2008 related to economic development. |
| Docket U-15675 | Power Supply Cost Recovery Plan | Request to recover $21 million in discounts provided in 2009 related to economic development. |
| Docket U-15744 | Stranded Cost | Request to recover $82 million in stranded costs associated electric customer choice. |
| Docket U-15805 | Renewable Energy Plan | Request to recover $1.8 billion in incremental renewable energy investment expenses between 2009 and 2029. |

| | | |
|---|---|---|
| Docket U-16045 | Power Supply Cost Recovery Plan | Request to recover $25 million in discounts provided in 2010 related to economic development. |
| Docket U-16191 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $178 million annually from customers. |
| Docket U-16485 | Natural Gas Cost Recovery Plan | Request to collect $1.1 billion in fuel costs from customers between April 2011 and March 2012. |
| Docket U-17281 | Energy Waste Reduction Reconciliation | Request to collect $17 million in financial incentives from customers. |
| Docket U-17301 | Renewable Energy Plan | Request to collect $2.9 billion in renewable energy investment expenses between 2009 and 2029 from customers. |
| Docket U-17317 | Power Supply Cost Recovery Plan | Request to recover $1.9 billion in annual power supply expenses from customers in 2014. |
| Docket U-17334 | Natural Gas Cost Recovery Plan | Request to recover $700 million in annual fuel expenses from customers between April 2014 and March 2015. |
| Docket U-17351 | Energy Waste Reduction Plan | Request to collect $470 million of investments in energy efficiency programs from customers between 2014 and 2017. |
| Docket U-17429 | Certificate of Necessity | Request to construct a 700-megawatt natural gas fueled combined cycle generation facility in Thetford Township. |
| Docket U-17643 | Natural Gas Base Rate Case | Requested approval to increase rates to recover an additional $88 million annually from customers. |
| Docket U-17678 | Power Supply Cost Recovery Plan | Request to recover $2.0 billion in annual power supply expenses from customers in 2015. |
| Docket U-17735 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $240 million annually from customers. |
| Docket U-18331 | Energy Waste Reduction Reconciliation | Request to collect $18 million in financial incentives from customers. |
| Docket U-20134 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $58 million annually from customers. |
| Docket U-20164 | Demand Response Reconciliation | Request to collect $1.4 million in financial incentives from customers. |
| Docket U-20322 | Natural Gas Base Rate Case | Requested approval to increase rates to recover an additional $229 million annually from customers. |
| Docket U-20697 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $244 million annually from customers. |
| Docket U-20963 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $225 million annually from customers. |
| Docket U-21224 | Electric Base Rate Case | Requested approval to increase rates to recover an additional $272 million annually from customers. |
